The logo for VR Sani-Co, featuring the letters 'VR' in a large, stylized font, followed by 'Sani-Co' in a cursive script. A green plant with leaves is positioned behind the letters, and several smooth black stones are scattered around the base of the logo.

A breath of fresh air in hygiene and care

Fresh Care

Services and Systems

Air Freshening

Air freshening is an important aspect of modern day washroom care and we can offer a choice of systems, a range of fragrances, and a variety of settings to meet most requirements.

The systems are the Air Movement Operated Freshener and the Aerosol Actuator System which are available on a regular service or as direct sale items.

Air Freshening

Aerosol Actuator/Air Fresh Unit
Dimensions:

Height: 170mm/160mm
Depth: 50mm/80mm
Width: 85mm/120mm

Soap Dispensing

The modern and attractive lever - operated dispenser provides a positive solution to hand washing requirements. The dispenser holds 1 litre refill sachets or can also operate on a bulk fill system. There is a choice of quality hand cleaners available to suit most situations. The dispenser can be attached to the wall, tiles or mirrors, using the integral adhesive pads or with wall plugs and screws as appropriate.

The system can be provided as a direct sale item or as a regular serviced item. Service is available on a 1, 2 or 4 weekly service to suit your specific needs.

Soap Dispensing

Dimensions:
Height: 250mm
Depth: 110mm
Width: 110mm

WC / Urinal Sanitising

Automatic sanitising systems play an important role in washroom hygiene as well as helping to prevent the build up of limescale and uric acid which can lead to smells and potential blockages - especially within the urinal pipework. The system has particular benefits in Kent and the South East where the water is especially hard due to the presence of high levels of calcium (lime). Cleaning and sanitising takes place at every flush.

The system is provided on a regular service with a range of settings to meet the needs of most situations.
